Combat Instructors

Modern crime and terrorism have spread throughout contemporary societies making it very difficult and challenging to prevent and neutralize such deadly threats and attacks to states, nations, companies, citizens, organizations and social institutions.

As in ancient times, professional education is the major building block for preparing individuals to face modern challenges. A failure in such a process causes atrocities with irreversible results that disrupt the functioning of societies.

Finding professional institutions in the security field that can teach the necessary operational skills to prevent, neutralize and face such hostile activity is a challenging journey. This requires instructors that have lived real life occurrences with extensive field experience to understand and develop techniques to survive such attacks.

However, this must be accompanied by extensive teaching experience that must be successfully passed on to individuals seeking to develop their career in instruction.

Condor offers a challenging and efficient course in combat instruction that is officially recognized by the Israeli Ministry of Defense.

Condor has all the necessary facilities in order to instruct courses in Israel. These facilities include vast equipment, firing ranges, training camps, weapons, combat equipment, conference rooms, simulation centers, accommodation and all the logical infrastructure required.

Condor provides consulting and training services at a client's requested destination.

These subjects are listed in a generalized version and are not in chronological order. The list does not include sub topics. The main topics of the course are:

- Realistic methods of professional instruction (armed and unarmed)
- Combat doctrines in different environments (urban, rural, buildings, planes, ships, bus, installations)
- Instruction of combat shooting with different weapons
- Methods of quick learning and instinctive reaction
- Safety procedures in instruction

- The structure of correct instruction
- Specific training methods including for unconventional specifications
- Executive protection
- Instruction under stress and limited time
- The creation of training programs
- Selection of training program to fit operational objectives
- Instruction of practical self defense techniques specific to security related situations
- Instruction of disarming techniques
- Simulations of instruction
- The training manual
- Methods and techniques of dealing with problems in coordination
- The building of simulation programs
- Methodology of instruction
- Self training program
- The instruction manual
- Professional instruction of techniques for specific functions:
 - Anti terror
 - Military
 - Naval security
 - Sky marshals
 - Body guards
 - Airports
 - Vehicle patrols
 - Bouncers
 - Concert halls
 - Shopping malls

Further additional training is required for the creation of operational combat units for new emergency purposes (i.e. suicide terror).

Remember: There is no bad student but only a bad instructor.
